

Explaining deals copying mechanism

We are going to explain subscription steps in automatic copying service to new customers and current ones. This is to help every customer to link their accounts easily. First we have to explain the meaning of automatic copying.

## What is Copy Pro service?

It is a service where you can connect your real trading account as an investor with another trader, one of the deal providers, on Caveo platform. The trades done by the deal provider will be copied directly in the investor account.

# Caveo customers

---

This service is exclusive to Caveo customers who have real accounts with us. If you still don't have a real account, here is what you have to follow:

First: Go to new account registration page and fill the required fields:

<https://caveo.com.kw/open-real-account/>

Second: Send your credentials to technical support team via e-mail:

[wecare@caveo.com.kw](mailto:wecare@caveo.com.kw)

Third: Your account must have a balance of at least \$250 to subscribe to the service.

Fourth: Review current eligible traders to follow:

<https://ratings.caveo.com.kw/accounts>

Fifth: Select the right provider to you

**Second: You will be shown a page contains many details. The segmentation of the page is as follow:**

### 1: **Provider ID**

Insert provider's ID from Traders Performance page

### 2: **Join Password**

In case the provider wishes to share his deals with specific traders, please contact the provider to ask for the password.

### 3: **Max.Loss Type**

Identify the maximum risk. It has three options:

- **No Max.Loss** Which is the trader specify no maximum limit for losses
- **Money** Specifying the losses maximum limit but with a consonant specific amount
- **Percent** Limit the maximum loss with a percentage of the gross balance.

### 4: **Subscriber MT5 Login**

Enter your real account number at Caveo

### 5: **Subscriber MT5 Password**

Insert your real account password

### 6: **Next**

Move to next page

The screenshot shows the 'Copy PRO' Subscription Register interface. It has two tabs: 'Main' and 'Sharing'. The 'Sharing' tab is active. Below the tabs, there is a 'Reverse' checkbox with a red '7' next to it. To the right is the 'Sharing Type' dropdown menu with a red '8' next to it, currently showing 'Autoscale Equi'. Further right is the 'Multiplier' input field with a red '9' next to it. Below these is the 'Max Deviation' input field with a red '10' next to it. At the bottom left is a green 'Subscribe' button with a red '11' next to it. A callout box for the 'Sharing Type' dropdown is shown, listing the options: 'Autoscale Equi', 'Autoscale Equity', 'Autoscale Free Margin', 'Sharing Full', and 'Sharing Fixed'.

## 7: **Reverse**

Select deals inverter (eg. Hedging)

## 8: **Sharing Type**

Identify deals management and implementation method on your own account. It has four options:

- **Autoscale Equity**

Identifying deal volume based on current balance in your real account

- **Autoscale Free Margin**

Identifying deal volume based on residual balance in your real

- **Sharing Full**

Identify deal volume to be equal to provider's deal volume

- **Sharing Fixed**

Identifying deal volume with a constant contract that won't change under any circumstances.

## 9: **Multiplier**

You can duplicate contracts number on your account directly with the provider's account.

## 10: **Max Deviation**

Identify the max limit of allowed points to be implemented in your account in case of fast market moves. If the market moves exceeds this number of allowed points, the deal won't be copied or implemented on your account.

## 11: **Subscribe**

Confirm subscription to deal copying service with the chosen provider
